

innovative technology for tomorrow

company profile

Sria Infotech is a global SAP consulting company delivering world-class services through refined methodologies, innovation, and a powerful synergy of modern technologies and extensive industry experience. Serving global clients across India, the US, and the APAC region, we provide end-to-end solutions ranging from SAP S/4HANA migration to custom application development and beyond—unlocking new growth possibilities for enterprises worldwide.

Our mission is to provide exceptional digital services—spanning enterprise software, AI, and IT consulting—while upholding our core values of being Smart, Resilient, Inclusive, and Agile. We are dedicated to transforming businesses, uplifting communities, and fostering innovation to build a better and more connected digital future.

Our Vision

At Sria Infotech, our vision is to build a future where technology empowers every business and individual to thrive. We stand for being Smart in our solutions, Resilient in our execution, Inclusive in our impact, and Agile in adapting to tomorrow's challenges.

At Sria Infotech Private Limited, we are proud to announce our strengthened collaboration with **IVC Consulting Group**. Over the last couple of years, this partnership has enabled us to deliver high-quality SAP solutions across global markets with greater efficiency, innovation, and reliability. Together, we combine the agility of a growing Indian tech company with the global expertise of an established consulting group.

This collaboration strengthens our joint ability to deliver SAP RISE, S/4HANA implementations, AMS, and digital transformation programs with global governance standards.

Together, SRIA and IVC are committed to delivering value-driven SAP solutions that empower businesses worldwide.

Data Analytics

We specialize in developing Power BI dashboards that integrate data from a wide range of sources, including SAP and other enterprise applications. Our team is adept at creating comprehensive data models and custom views to help businesses visualize and interpret complex data, empowering informed decision-making.

In today's fast-paced environment, businesses must make quick decisions based on constantly changing data from multiple sources. The ability to efficiently collect, analyze, visualize, and articulate this data is critical to seizing opportunities and staying ahead of the competition.

We are an expert in Data Analytics with proficiency in Power BI, Fiori, and SAC.

Specializes in developing complex KPIs such as Finance, Production Costing, and Operations dashboards. Successfully built real-time management and operations dashboards in SAP, leveraging HANA modelling and integrating with Power BI.

Created views using RAP and CDS views for Fiori, and developed KPIs within the Fiori framework. Developed KPIs in SAP with direct integration to Power BI for enhanced analytics and reporting
